

Wanan Sheng is a Senior Research Fellow and the lead hydrodynamicist at the Centre for Marine and Renewable Energy Ireland (MaREI), Environmental Research Institute (ERI), University College Cork, Ireland. His research work is mainly on the device and technology development for marine renewable energy conversion, and his research on the fundamental problems in wave energy conversions and on the cost reduction of wave energy production has led to fruitful publications and technology improvements. He has published 35 peer-reviewed journal papers and 29 peer review conference papers, together with 4 book chapters.

Dr. Sheng is an editorial board member for *Renewable Energy*, and services as members of several scientific committees, including the International Conference on Ocean, Offshore and Arctic Engineering (OMAЕ), Renewable Energies offshore (RENEW), the International Ship and Offshore Structures Congress (ISSC), and the International Electrotechnical Commission (IEC) national expert.
